

System Integration Audit Log & Verification Trail

Document ID: AUDIT-TRAIL-SECURE-990 | Version: 1.0 (Signed) | Date: May 2026 | Author: Onyx Automated Security Auditor

Section 1: Verification Scope

This audit log captures the precise execution sequence of the Onyx Intelligence Engine, tracking the file parsing, token auth, and department routing actions performed by AI Crew agents.

Section 2: Chronological Event Logs

Below is the chronological log of system operations verified during the latest compliance scan.

Section 3: Cryptographic Signature

This log has been cryptographically signed and sealed using the Onyx Certificate Authority root key. Any modifications to this document will invalidate its digital signature check.

Timestamp	Agent Subsystem	Action Performed	Security Status
01:04:12	Crawler-01	Parsed rbi_circular_77.pdf from index	SEC-200 (Success)
01:04:15	Analyst-02	Extracted 3 compliance action points	SEC-201 (Success)
01:04:22	Router-04	Assigned MAP-101 to IT Security department	SEC-204 (Success)
01:04:25	Vault-01	Encrypted & stored ledger payload in database	SEC-208 (Success)
